

Summary

B.Tech CSE (AI/ML) student at VIT (2027), interned as GenAI Developer at ROVA (Engineered vision parsing pipelines, 40% document processing reduction), national hackathon winner (Top 1% of 5,000+, 25,000 prize), and Microsoft Learn Student Ambassador (Beta). Consistently shipping production-grade systems and winning under competitive pressure.

Skills

Programming: Python, C++, SQL,Java (basics)
Web Development: React, Django, Flask, REST APIs
AI/ML: TensorFlow, PyTorch, scikit-learn, OpenCV, NLTK
Cloud & DevOps:Azure, Docker, Git, CI/CD Pipelines
Databases: MySQL, PostgreSQL, MongoDB
Soft Skills: Collaboration, Leadership, Adaptability

Education

Vellore Institute of Technology	Bhopal, MP
B.Tech CSE (AIML) — CGPA: 8.83/10	2023 - 2027
<i>Coursework:</i> DSA, OOPs, ML, DL, Big Data Fundamentals	
Ryan International School	Delhi
Class 12 Science (Non-Medical) — 88.2%	2021
Ryan International School	Faridabad
Class 10 CBSE — 96%	2019

Experience & Leadership

GenAI Solution Developer Intern, ROVA (Botter Solutions Pvt Ltd)	May 2025 – July 2025
Engineered vision-parsing pipelines (LLaMA Parse, YOLOv11/v8, TATR, etc) following SDLC methodology, collaborated cross-functionally to deploy production solutions, reducing manual document processing overhead by 40%	
Microsoft Learn Student Ambassador (Beta)	Jan 2024 – Present
Delivered 3 Azure/AI workshops to 150+ students (92% satisfaction), Azure cloud services, cloud deployment fundamentals	
General Secretary, Hindi Club	Jul 2024 – Present
Automated UTR verification & QR systems reducing processing time by 70% across 1,500+ transactions and 1000+ attendees	
Student Coordinator, SPACEVITA	Oct 2024
Led event coordination for a 300+ attendee university event featuring the Former ISRO Director, documentary.	

Projects

ElderAI – Intelligent Memory Companion Full-Stack AI System	🔗
<i>Next.js 15, React 19, Supabase, Gemini, Groq, Jitsi SDK</i>	Dec 2025 – Feb 2026
- Built an AI-powered elderly-care platform enabling multimodal memory capture (text, voice, image) and conversational retrieval to support memory retention and Alzheimer’s care using Gemini, Groq, Next.js, and Supabase. - Engineered secure real-time collaboration for caregivers and families with cloud sync, persistent memory timelines, and low latency inference workflows, supporting concurrent multiuser interactions via Jitsi SDK.	
Document Approval System Software Development	🔗
<i>React, CSS, Firebase, SDLC</i>	June 2025 – July 2025
Built a platform to streamline the university’s document approval process by enabling online submission, tracking, and feedback. Deployed on Firebase with CI/CD pipeline, reduced approval cycle time from 3 days to under 4 hours.	
VITAL-AI Full-Stack Web App	🔗
<i>Machine Learning, Python, React, TensorFlow, Flask</i>	Feb 2025 - Mar 2025
- Developed a comprehensive platform during a HackByte 3.0 at IIITDM Jabalpur that combines daily health monitoring (Google Fit sync, water and fasting trackers) with real-time disease risk prediction using Random Forest models. - Designed intuitive UI dashboards, Built RESTful microservices using Flask with PostgreSQL backend, flag risks, and recommend doctor visits based on combined vitals and diagnostic results.	
Advanced Parkinson’s Detection via Speech Analysis Neural Networks	🔗
<i>LSTM Neural Networks, Python, GRUs, GAN</i>	Jan 2025 - Feb 2025
Engineered a Bi-LSTM model to detect early Parkinson’s disease from speech, achieving 93% average accuracy with strong F1-score and precision on benchmarked datasets(from UCI repository).	

Achievements & Competitions

Competitive Programming

- CodeChef: **1599-rated** with consistent monthly contest participation. 🔗
- LeetCode: Solved **450+ problems** across DSA domains(Arrays, Binary Search, Trees, Graphs). 🔗
- Strong foundation in algorithms and problem-solving.

Hackathons & Competitions

- Bank of Baroda Hackathon: **Top 20** among 5k+ people with AI Financial Advisory solution.
- Canara SuRaksha Cyber Hackathon: **Top 1%-** Won 25,000 prize, building financial security application.
- ACWOC25 (Open Source): **3rd place** among 600+ participants for code quality and innovation.

Certifications

AWS Certified Cloud Practitioner 🔗	Azure AI Document Intelligence Solution 🔗
Google IT Support Certificate 🔗	Oracle Cloud 2025 Certified AI Foundations Associate 🔗
